1. SUMMARY OF DEFENSIVE RESEARCH & REASON FOR APPEAL

I am an independent systems and binary security researcher auditing open-source C/C++ network/media parsers, embeddable bytecode VMs, and AI/MCP server infrastructure under Coordinated Vulnerability Disclosure (CVD). My identity is verified via Persona (VERIFICATION_TYPE_TAF_CYBER_IDV). This dossier documents 4 vendor-confirmed/patched vulnerability disclosures, 36 active private GHSA reports in maintainer triage, 4 active HackerOne disclosures, and 3 CERN/Zenodo DOIs to satisfy CVP Defense Access eligibility.
